**D. Answer the following questions.**

1. Define the terms input and output.

Ans: Input: Data and instructions given to a computer is called input.

Output: The results given to us by a computer is called output.

2. What do you understand by processing?

Ans: Processing means working on the input and producing the correct result, that is, output.

3. What is storage device?

Ans: A storage device is used in computers to store data.

**FUN TIME**

A. We often compare a man with a computer. Tick the one which is better with regard to:

1. Speed of work

Man/**Computer**

2. Accuracy

Man/**Computer**

3. Memory

Man/**Computer**

4. Decision Making

**Man**/Computer

5. Feelings and emotions

**Man**/Computer

B. Identify these devices and name them. Also write 'I' for input device, 'P' for processing device and 'O' for output device in the given boxes.
