

# Ln-4 LIVING AND NON LIVING July

## I Technical words

1. Man made things - Man made things are made by humans.  
Example, car, building

2. Natural things - Natural things are given by nature and not man made.  
Example, animals, plants

## II Short Answer

1. Why do living things need food?

Ans \* Living things need food to live.  
\* Food help them to grow.

2. Why do you need breathe? Name two organs that animals use to breathe.

Ans \* We need to breathe because we cannot live without air.

\* The two organs that animals use to breathe are lungs and gills.

## III Long Answer

1. Why do living things move?

Ans \* The movement of living things show that they are alive

\* Birds and insects fly. Dogs and cats walk. Fish

swim. These animals move because they have life.

\* When touched, plant like the 'touch-me-not' (mimosa) show slow movement.

\* The sunflower turns towards the sun.

\* However, does a table move by itself? No we have to move it.

\* Therefore we can say that only living things move on their own.

2. What are the characteristics of living things?

Ans \* Living things can move, grow, breathe, need food and they can reproduce.

IV Hots:

1. A chair is a man-made thing, made from the natural wood of the tree. What are the three major differences between the chair and tree (living or non-living)?

The three major differences between the chair and tree are:

a) The chair cannot breathe but the tree can breathe.

b) The chair cannot grow but the tree can grow.

c) The chair cannot feel but the tree can feel.
