

class: VIII

Topic: Animation in Krita

Month: July

I Answer the following questions:

1. Explain the concept of layers in Krita.

Ans: Layers are like a stack in which objects, such as drawing, images, or text are placed one over the other or side-by-side. Each layer can be edited independently without affecting other layers.

2. How can you delete the layer in Krita?

Ans: To delete a layer, select the layer that you want to delete and press the Delete key from the keyboard, or Right click on the layer you want to delete from the context menu, select the Remove Layer option.

3. Differentiate between frame and keyframe.

Ans: A frame is defined as a little rectangular cell that appears on the timeline. Keyframes are the special type of frames that define some changes to an object's properties for animation, like position, colour, shapes, etc - ..

4. What is the significance of timeline in Krita?

Ans: The timeline is the area from where we can control the sequencing and timing of the graphics and other elements

of the animation.

II Competency-based questions:

Q. Smita is trying to create an animation in Krita, for which she needs to hide a layer. Which option should she use to do so?

Ans: Smita should use the "Eye" icon to hide a layer.
