

Class : VIII

Topic : Audacity

Month : August

I Answer the following questions:

1. What is the use of timeline in Audacity?

Ans: The Timeline displays a horizontal ruler above the playing tracks, measuring time from zero (the start of the track). It shows the duration of the audio in minutes and seconds.

2. How is the Device toolbar useful?

Ans: The Device toolbar lets you select the devices for the input (recording) as well as output (playback).

3. What is Audacity? Explain two of its features.

Ans: Audacity is a popular, free audio editor and recorder software. It is used to record and edit sounds.

4. Describe any two operations that you can perform while editing an audio file in Audacity.

Ans: You can copy and move using Edit menu.

II Competency based questions:

1. Rohan wants to edit an audio file using Audacity. He does not know which toolbar has the tools for editing. Suggest him the

toolbar to use for the same.

Ans: Edit Toolbar.

2. Annima wants to record her voice for a project. Using which menu can she check the audio settings to make sure that the recording and playback devices are selected?

Ans: Mixer Toolbar.
