PollutionI Dictation Words

1. pollutants
2. land pollution
3. water pollution
4. air pollution
5. noise pollution
6. firecrackers
7. fertile
8. breed
9. factory smoke
10. harmful

II Fill in the blanks :-

1. Fruits and vegetable peels decay and make the soil fertile.
2. The substances that make the environment dirty are called pollutants.
3. Loud and unpleasant sound causes noise pollution.
4. Germs and pests like rats breed on garbage spreading diseases.

III Give two examples:-

1. Noise pollution - loud speaker, firecrackers
2. Air pollution - factory smoke, bus smoke.

V Answer the following questions:-

1. What is pollution?

Ans - Pollution is the presence of harmful substances in the air, water and land.

2. What are the different ways in which land gets polluted?

Ans - Land gets polluted by garbage from homes and wastes from industries. Dirty water from drains also causes land pollution.

3. What are the causes of air pollution?

Ans - Harmful smoke that comes out of cars, buses and factories pollutes the air around us. Burning of plastic and garbage also causes air pollution.

4. How is water pollution harmful?

Ans:- Water pollution is harmful because it makes water dirty and unsafe to drink. It harms animals living in and causes diseases in people.

VI Think and Answer:-

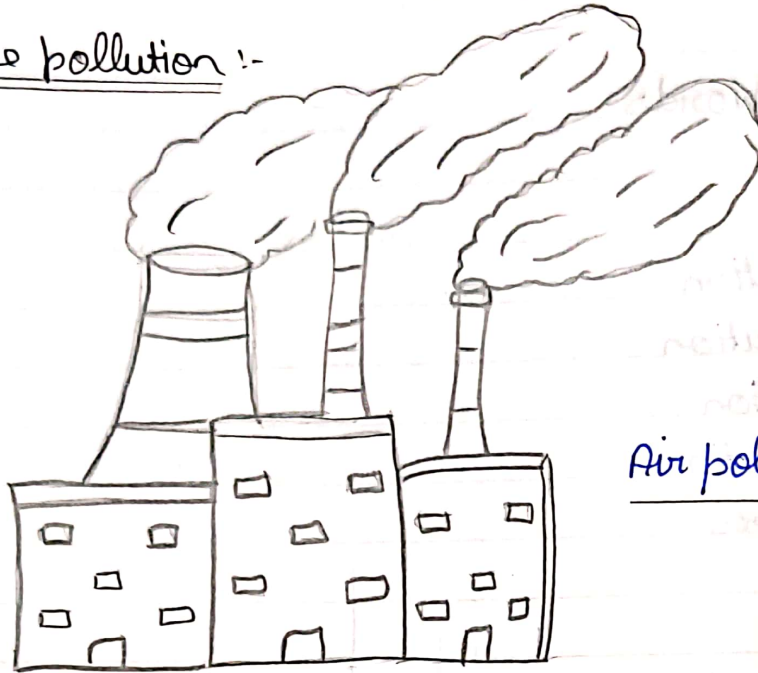

1. A landfill is a place used for dumping waste collected from towns and cities. Why are landfills situated far away from our homes?

Ans: Landfills are kept far away from homes because they have a lot of garbage that can smell bad and breed germs.
