SEMESTER : 2

STD - I

Month : October

Ch 1: Multiplication

I Multiplication facts

1. Multiplying by 1.

When we multiply a number by 1, we get the number itself. Same number.

E.g $3 \times 1 = 3$

2. Multiplying by 0.

When we multiply a number by 0 (zero) we get 0 (zero)

E.g $2 \times 0 = 0$

3. Order in Multiplication

When we change the order of the numbers to be multiplied, the answer remains the same

E.g $2 \times 3 = 3 \times 2$

(or) $6 = 6$

II Fill in the blanks

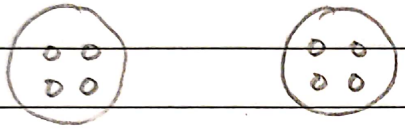

1. Repeated addition of the same numbers is called multiplication

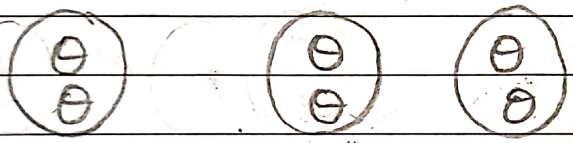

2. The sign 'x' indicates multiplication

3. 2 + 2 + 2 + 2 = 4 times 2

4. 5 x 3 = 15

III Observe the pictures and multiply

(a)  = 2 x 4 = 8

(b)  = 3 x 2 = 6

IV Complete the given sequence using skip counting by

(a) 2 s

7, 9, 11, 13, 15

(b) 5 s

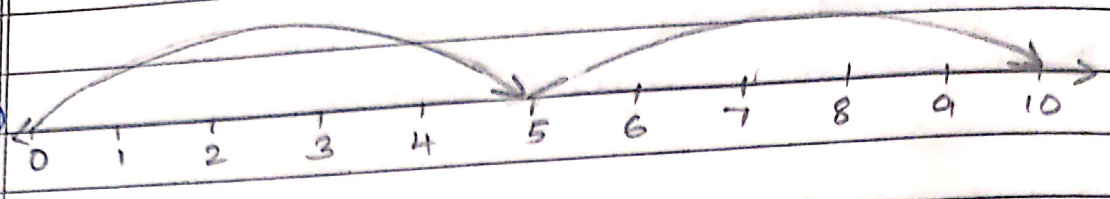

20, 25, 30, 35, 40

V Multiply the following on the number line

(a)

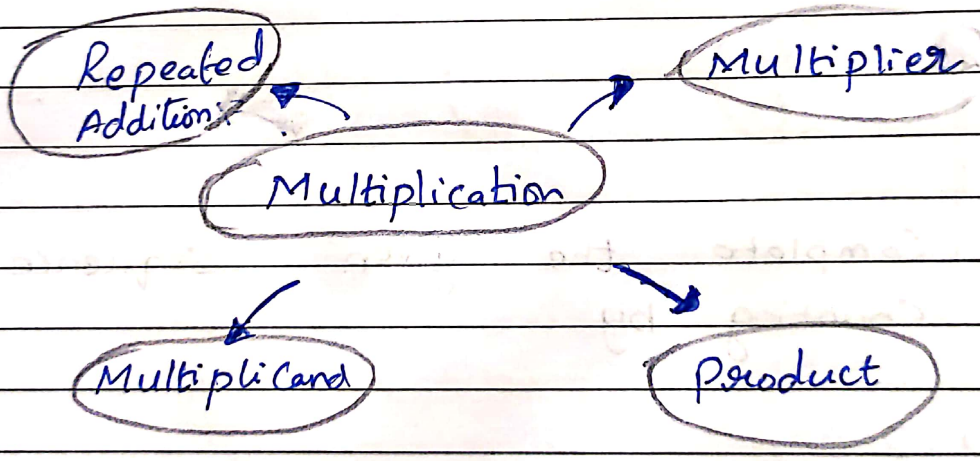

2 × 5 = 10

(b)

4 × 2 = 8
